

# Cookie Policy

Last updated: 31 March, 2022.

## 1. Introduction

The website <https://www.webcat-solutions.com> uses cookies.

This Cookie Policy applies to all users of the website <https://www.webcat-solutions.com>.

The information presented below is intended to inform the users of these websites about the placement, utilisation and management of the cookies by Autonet Import SRL („Autonet”).

## 2. What are cookies?

We use the term „cookies” to refer to cookie modules and similar technologies that can be used to collect information automatically.

An „Internet Cookie” (also known as „browser cookie” or „HTTP cookie” or „cookie”) is a small file consisting of letters and numbers, which will be stored on the computer, the mobile device or other equipment, used by the user to access the internet.

Cookies are installed following the request emitted by a web server to a browser (for example: Internet Explorer, Edge, Firefox, Chrome). Once installed, cookies have a defined lifespan, after that they remain “passive”, meaning that they don’t contain software programs, viruses or spyware, and they won’t access any information on the hard drive of the user, on whose equipment they were installed.

A cookie is composed of two parts: the name of the cookie and the content or the value of the cookie. From a technical point of view, only the web server that sent the cookie can access it again, as soon as the user returns to the website associated with the respective web server.

## 3. Purposes of using cookies through this website:

Cookies are used in order to assure the functionality of a website, to optimize its content and to provide the best possible browsing experience for the users of these websites, as well as services adapted to the needs and interests of each user, namely for:

- Improving of the utilisation of these websites, including the identification of any errors during browsing the website by the users;
- Providing anonymous statistics regarding the use of this website for Autonet Import as the owner of this website;
- Anticipating the potential goods that will be made available for the users through these websites, depending on the accessed services / products.

The use of cookies allows the saving of certain settings/ preferences set by the users of these websites, such as: the language in which the website is displayed.

## 4. What is the lifespan of a cookie?

The websites of Autonet Import use the following cookie categories. The type of the cookie determines the lifespan of the cookie:

**Session cookies** – A “session cookie” is a temporary cookie that is automatically erased when the user closes the site or the browser.

**Persistent or permanent cookies** – A “persistent” or “permanent” cookie is stored on the user’s device after finishing the session or closing the browser, until it expires (the lifespan can vary between minutes, days or years), or until the user deletes the cookie, at any moment, by changing the settings of the browser.

## 5. What are third party cookies?

Some parts of the website’s content may be provided by a third party, this means that they are not provided by Autonet Import. In this case the cookies are placed by a third party, and they are called “third-party cookies”.

The providers of the third-party cookies must also comply with the data protection rules and the Privacy Policy of this website.

## 6. Cookies used by websites:

Generally, a website uses the following cookie types:

- a. Strictly necessary cookies;
- b. Statistic cookies;
- c. Preference cookies;
- d. Marketing cookies;
- e. Unclassified cookies

### a. Strictly necessary cookies

Strictly necessary cookies contribute to the website’s usability by enabling basic functions like page navigation and access to secure areas of the website. The website cannot function properly without these cookies. You can set your browser to block or warn you about these cookies, but in this case, some parts of the website may not work.

### b. Statistic cookies

Statistic cookies are used for statistical purposes. They help the website’s owner to understand how visitors interact with the website, for example if a certain website user previously browsed the website (how many times / how long etc.). They anonymously collect and report information. The collected information helps to improve the site’s performance and functionality.

### c. Preference cookies

Preference cookies enable a website to remember the preferences of the website’s user regarding the way the website behaves or looks, like your preferred language or the region that you are in. In this way it isn’t necessary to set your preferences again when you visit the website later.

### d. Marketing cookies

Marketing cookies are used for personalising online advertising. The intention is to display ads that are relevant and engaging for the individual user. These cookies are anonymous, they store information only about the accessed content, but not about the user.

### e. Unclassified cookies

Unclassified cookies are cookies that are in the process of classifying, together with the providers of individual cookies.

## 7. What kind of information is stored and accessed through cookies?

Cookies store information about the website in a small text file on the device from which the website was accessed.

From technical point of view, only the web server that sent the cookie can access it again, as soon as the user returns to the website associated with that web server, until the cookie expires or is deleted.

Cookies themselves do not require personal data to be used and, in most cases, do not personally identify Internet users. Cookies can collect information such as: IP address, geolocation data, device operating system data, device resolution data, information about the website visit for example the number of visitors, the time spent on that website, the way the site was accessed, etc.

## 8. Customising browser settings for cookies

If the use of cookies is not annoying and the computer or technical equipment used to browse these websites is used only by you, you can set long expiration dates to store your browsing history.

If the device used to browse these websites is used by more than one person, you may consider setting it up to delete individual browsing data each time the browser is closed.

## 9. How to block cookies?

The website's user can change at any time the permission to use different types of cookies (accept or refuse), at the bottom of the website, by accessing the option "Cookie settings".

Users can also delete cookies at any time from their browser settings, or configure their browser to reject cookies or to accept cookies from a website.

All modern browsers offer the possibility to change cookie settings. As a rule, these settings can be accessed in the "Settings" section or in the "Preferences" menu of your browser.

However, refusing or disabling cookies does not mean that you will no longer receive online advertisement - only that it will not be adjusted to your preferences and interests according to your browsing behaviour.

The following links may be useful to understand these settings:
